# Special Purpose Programs

Providing local pharmacy care support services for your patients living at home.

[PCaH@cpesn.com](mailto:PCaH@cpesn.com)

## Benefits to Pharmacies

- Increased Profit: Boost revenue through higher reimbursement from payers recognizing this higher level of care and reduce your cost of goods through valuable buy-side opportunities
- Secured Patient Base: Retain your in-home seniors and other special needs patients as competitors develop at-home services
- Value-Based Care Opportunities: Position for value-based care arrangements with reimbursement linked to patient outcomes through CPESN
- Improved Workflow and Efficiency: Incorporate shared best practices for more efficient operations and better use of pharmacy staff

## Requirements

- CPESN USA LTC NPI in good standing and affiliated with a local network

## Cost

Subscription is included in your CPESN USA participation fee of \$125 per month

Enabling revenue sharing through a new model of physiatry collaborative care.

[ppc@cpesn.com](mailto:ppc@cpesn.com)

## Benefits to Pharmacies

- Lead in the delivery of long-term and in-home care focused on patient frailty, mobility, and patient empowerment
- Leverage pharmacist collaboration with physiatrists—whole-person focused physicians trained in leading treatment and rehabilitation care for aging, disabled, and other high-risk patients
- Unlock new revenue stream opportunities within a growing \$265/B industry
- Management Services Organization (MSO) support for your pharmacy's selection and adoption of the collaboration model that suits your market
  - Identify and introduce physiatrists to pharmacy practice to support primary care
  - Access tech-enabled resources to help patients better self-manage at home

## Requirements

- CPESN USA member in good standing and affiliated with a local network
- PPC@Home participating pharmacies must be able to provide, execute and complete effective medication management services including MTM, Medication Reconciliation, Transition of Care Management, and consulting services among others, and deliver, offer to deliver, or provide some means to be able to address patient needs directly at home.

## Cost

Model varies with state laws regarding medical practice ownership.
